

## Big Flippin' Ad Truck

Notice of violation

Notice #1

**Is your Advertising catching your customers attention like this red light camera caught mine?**

Red light cameras are everywhere just like our trucks. Major intersections where lots of traffic congests the roads, always trying to get caught in the left hand turning lane, going just a little slower then traffic to insure your investment in customers is getting attention.

*Dallas Country Wide, targeting the employees of another company that had already been trained to do the work they needed to do, so we customized a route that included parking in the general area of these employees while they were coming and going from work. As a result the company we were working with gained the desired employees and saved thousands of dollars by not having to do the extensive training with new hires.*
